

NEBRASKA

Surface Transportation

PROGRAM BOOK

Dave Heineman
Governor

Fiscal Years
2010 - 2015

Monty W. Fredrickson, P.E.
Director – State Engineer

A Message from the Governor

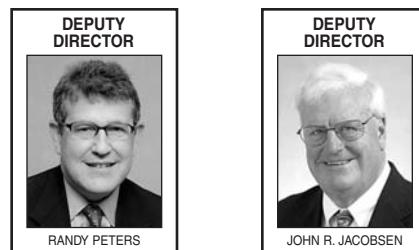

Transportation is vital to our everyday lives. The roads and bridges that we travel each day serve families, businesses, medical, agricultural, and social needs that sustain our quality of life.

Our safety and economic viability depend in part on a reliable and affordable transportation infrastructure in our communities and across our country.

The Nebraska Surface Transportation Program for the upcoming Fiscal Year is a plan to preserve and improve our highways and bridges and continue to provide the safe and reliable system our state and its visitors expect.

A handwritten signature in black ink that reads "Dave Heineman". The signature is fluid and cursive, with "Dave" on top and "Heineman" on the bottom, slightly overlapping.

Abbreviations and Definitions

Road building, like every other occupation, has its own vocabulary, its "shorthand" and its abbreviations. The following are those most commonly used in this booklet:

Armor Coat - A thin covering of gravel placed after the roadway surface has been sprayed with asphalt.

Br. (Bridge) - Structure over stream or roadway. May include new construction, reconstruction, widening or rehabilitation of existing structure. May include reconstruction of approaches.

Conc. (Concrete)

Crack Seal - The sealing of random and reflective cracks in concrete and bituminous pavements with a hot-pour type sealer.

Culv. (Culverts) - Pipes or concrete boxes necessary to carry water under the roadway.

Dowel Bar Retrofit - Placement of steel bars into existing concrete pavement to distribute the loads more uniformly.

Fog Seal - A thin coat of bituminous material sprayed on the surfacing to prevent the intrusion of water.

Gr. (Grading) - The movement of earth needed to construct the project as designed.

Grinding - Diamond grinding to smooth the surface of a concrete pavement.

Interchange - Construction of a new interchange or revision of existing interchange and connecting roads.

Joint Seal - The replacement of the seal at the transverse and longitudinal joints in concrete pavements with a hot-pour type sealer.

Microsurfacing - A thin layer of asphalt slurry material spread to remove rutting and surface irregularities in asphalt pavements.

Mill, Inlay - The milling of a certain thickness of asphalt surfacing from the driving lanes and replacement with a like thickness of new asphalt surfacing.

Prel. Eng. (Preliminary Engineering) - The process preceding actual construction of a project. May include corridor study, project planning or design.

Pvmt. (Pavement)

RR (Railroad)

Resurf. (Resurfacing) - Additional layer of surfacing material placed on top of existing hard-surfaced road to improve rideability and strength of roadway. May include minor widening of roadway and structures.

R.O.W. (Right-of-Way) - Early acquisition of right-of-way as separate project.

S. Shld. (Surfaced Shoulders) - Hard surfacing the shoulders of an existing or new hard-surfaced road. May include minor grading and structure widening.

Str. (Structures) - Culverts, bridges and/or viaducts, either new or reconstructed.

Surf. (Surfacing) - Hard surfacing, either concrete or bituminous.

Underpass - Structure on roadway passing under railroad tracks.

Urban - Construction of divided or undivided curbed roadway in an urban area. May include grading, structure and incidental work.

Viaduct - Structure over a railroad or other roadway.

The System is Our Priority

**By Monty W. Fredrickson, P.E.
Director – State Engineer, Nebraska Department of Roads**

The importance of our state's surface transportation system, not only to Nebraska, but to the entire nation, is an issue greatly appreciated by the Department of Roads. Our economy and quality of life depend upon a well-functioning transportation system. To ensure mobility and reliability, preserving and operating our statewide system has become the NDOR's priority.

We will continue to do our best to meet the transportation challenges that lie ahead and provide an efficient highway system for the movement of people and goods.

Funding for the Fiscal Year 2010 Surface Transportation Program

Nebraska's Surface Transportation Program is financed by three major funding sources—state, federal, and local funds.

State Funds

Historically, Nebraska has been a “pay-as-you-go” state using the traditional revenue sources to fund the needs of the State Highway System. State funds are derived from three primary highway user revenue sources: (1) fuel taxes {gasoline, gasohol, and diesel}, (2) sales taxes on new and used motor vehicles, trailers, and semi-trailers, and (3) motor vehicle registration fees.

Fuel taxes comprise about 68% of state revenues, sales taxes generate about 20%, registration fees make up about 9% and the remaining 3% are derived from various miscellaneous revenue sources.

The FY-2010 State Highway System program is based on a Highway Cash Fund appropriation of \$368 million. Approximately \$169 million of the total revenue is available for the state highway construction program. The remaining \$199 million is set aside for routine highway maintenance, administration, supportive services, carrier enforcement, transit, rail, and construction overhead. Also, about \$8.1 million of state Recreation Road, Grade Crossing, and State-aid Bridge funds are available for projects both on and off the State Highway System.

Federal Funds

Federal funds are derived from highway user revenues paid to the Federal Highway Trust Fund. These revenues are returned to the states based on a reimbursement process, whereby the states utilize their funds first, then bill the federal government for reimbursement. The majority of federal revenues, approximately 90%, come from gasoline and diesel fuel taxes. Approximately 10% of federal revenues are derived from heavy vehicle sales and use fees and heavy tire taxes.

Historically, federal funds are based on a multi-year transportation act enacted by Congress. Then, each year Congress establishes funding levels through the annual appropriation process. The Federal Highway Administration distributes the funds by means of formula allocations as established by law.

The current transportation act, referred to as SAFETEA-LU, provided funding for federal fiscal years 2005 through 2009, but the act expires on September 30, 2009. Consequently, our FY-10 Surface Transportation Program is based on the assumption that federal highway funding for FY-10 will be sustained at the FY-09 level. Several issues must be addressed by Congress to secure federal funding for FY-10 and beyond: (1) maintaining solvency of the Federal Highway Trust Fund, (2) an \$8.7 billion rescission currently contained in SAFETEA-LU, and (3) passage by Congress of a new multi-year transportation act, or congressional passage of continuing resolutions until a new act can be approved.

Also, the FY-10 Program contains federal stimulus funds provided by Congress and the President, through passage of the American Recovery and Reinvestment Act (ARRA) of 2009. It is highly likely this funding is not sustainable and will be available only through the period covered in Public Law 111-5.

All federal highway funding made available to Nebraska is shared between the State, cities and counties, inclusive of the stimulus (ARRA) funds. Approximately 74% of the core federal highway funds are used on the State Highway System and about 26% are used on the Local System for county roads and city streets.

Local Funds

Local funds are comprised of state highway user fees allocated by formula to the cities and counties from the State Highway Allocation Fund, approximately \$188 million.

Fiscal Year 2010 Surface Transportation Program

Funding (<i>millions</i>)	
State System	
State	\$ 169.000
Federal	148.513
Other	7.472
Subtotal	324.985
ARRA	161.695
Total State Program	\$ 486.680
Local System	
Federal	\$ 60.270
Highway Allocation Fund	188.030
Recreation Road &	
State-aid Bridge	4.468
Subtotal	\$ 252.768
ARRA	73.893
Total Local Program	\$ 326.661
GRAND TOTAL	
	\$ 813.341

State System:

The FY-2010 State Highway System construction program is \$478.2 million and includes 152 new projects which total \$391.3 million. Additionally, \$7.0 million for statewide planning and \$1.5 million for research are also programmed.

Local System:

The local system program will include those projects selected by the cities and counties for FY-2010 as determined through the local planning and programming processes.

The local system program includes highway user fee revenues available from the federal Highway Trust Fund, state Highway Allocation Fund and state Recreation Road and State-aid Bridge funds for a total of \$326.7 million
